PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building MERN stack applications, RESTful APIs, and responsive web interfaces. Skilled in JavaScript, React.js, Node.js, Express.js, and database management using MongoDB and MySQL. Experienced in developing real-world applications including e-commerce and food ordering platforms with authentication, order management, and backend integration. Strong interest in scalable software engineering, problem-solving, and product development within fast-paced environments.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, Java

Frontend: React.js, HTML5, CSS3, Responsive Web Design

Backend: Node.js, Express.js, RESTful APIs

Database: MongoDB, MySQL

Core Concepts: Data Structures, OOP, SDLC, CRUD Operations, API Integration, Authentication

Tools: Git, GitHub, Postman, Vercel, Render

AI & Productivity: ChatGPT, AI-assisted Development Tools

EXPERIENCE

MERN Stack Developer Intern

Chennai, Tamil Nadu

Besant Technologies

Jan 2026 - Present

- Developed and integrated full-stack web applications using React.js, Node.js, and Express.js
- Built and tested RESTful APIs for authentication, user management, and application workflows
- Implemented secure JWT-based authentication and backend validation logic
- Created reusable React components to improve UI consistency and maintainability
- Integrated frontend and backend systems for seamless API communication and data flow
- Debugged application issues and improved performance and scalability

PROJECTS

Om Vilas Condiments | Live : <https://omvilas-condiments.vercel.app>

- Built a MERN-based e-commerce platform with authentication, cart, order, and payment workflows
- Developed RESTful APIs for product, cart, order, and payment management
- Implemented JWT-based authentication and secure session handling
- Integrated Cash on Delivery (COD) and UPI payment workflow
- Designed scalable MongoDB schemas for efficient order and payment tracking
- Created responsive UI ensuring seamless experience across devices
- **Tech Stack:** React.js, Node.js, Express.js, MongoDB, JWT

Vicky's Restaurant | Live : <https://vicky-restaurant.onrender.com>

- Developed a full-stack food ordering platform with dynamic cart and order management functionality
- Implemented secure login and session management features
- Built REST APIs for user, product, and order operations
- Developed order placement and delivery tracking logic with real-time status updates
- Optimized frontend responsiveness and user experience across devices
- **Tech Stack:** React.js, Node.js, Express.js, MySQL/MongoDB

Smart Attendance | Github : https://github.com/vicky9790/smart_attendance

- Built an attendance management application using Node.js and MongoDB
- Implemented role-based authentication and authorization using JWT
- Designed scalable database schemas using Mongoose
- Developed CRUD operations with validation and error handling
- **Tech Stack:** Node.js, Express.js, MongoDB, JWT

EDUCATION

2022-2026

B.E. Computer Science and Engineering – Arjun College of Technology (2022–2026) | CGPA: 8.1
